

Portfolio Website

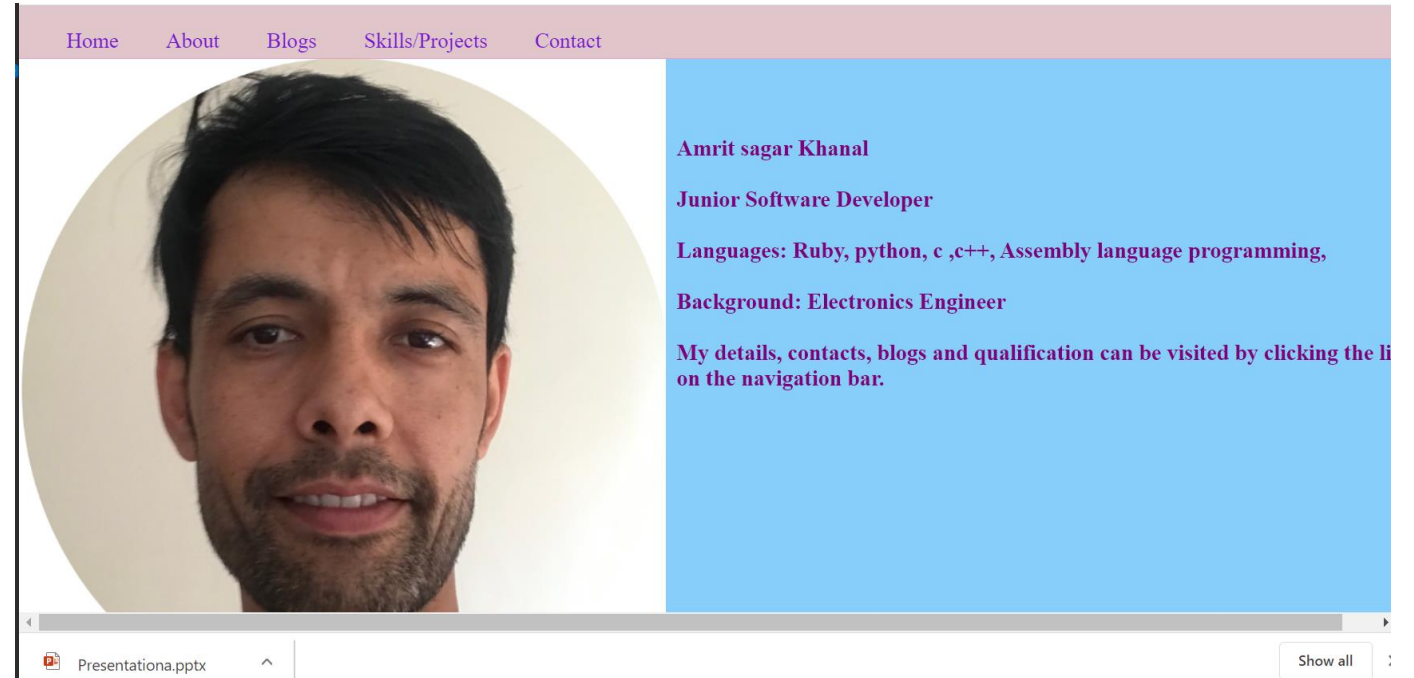

Amrit Sagar Khanal

Design concepts and preferences

- I have focused on simple design.
- I have tried to implement most of the html and css features I have learned.
- This design is responsive to devices of different sized windows (mobile, desktop, pads and tabs).

My inspiration for colors and other attributes

Colors

Main colors I've used:

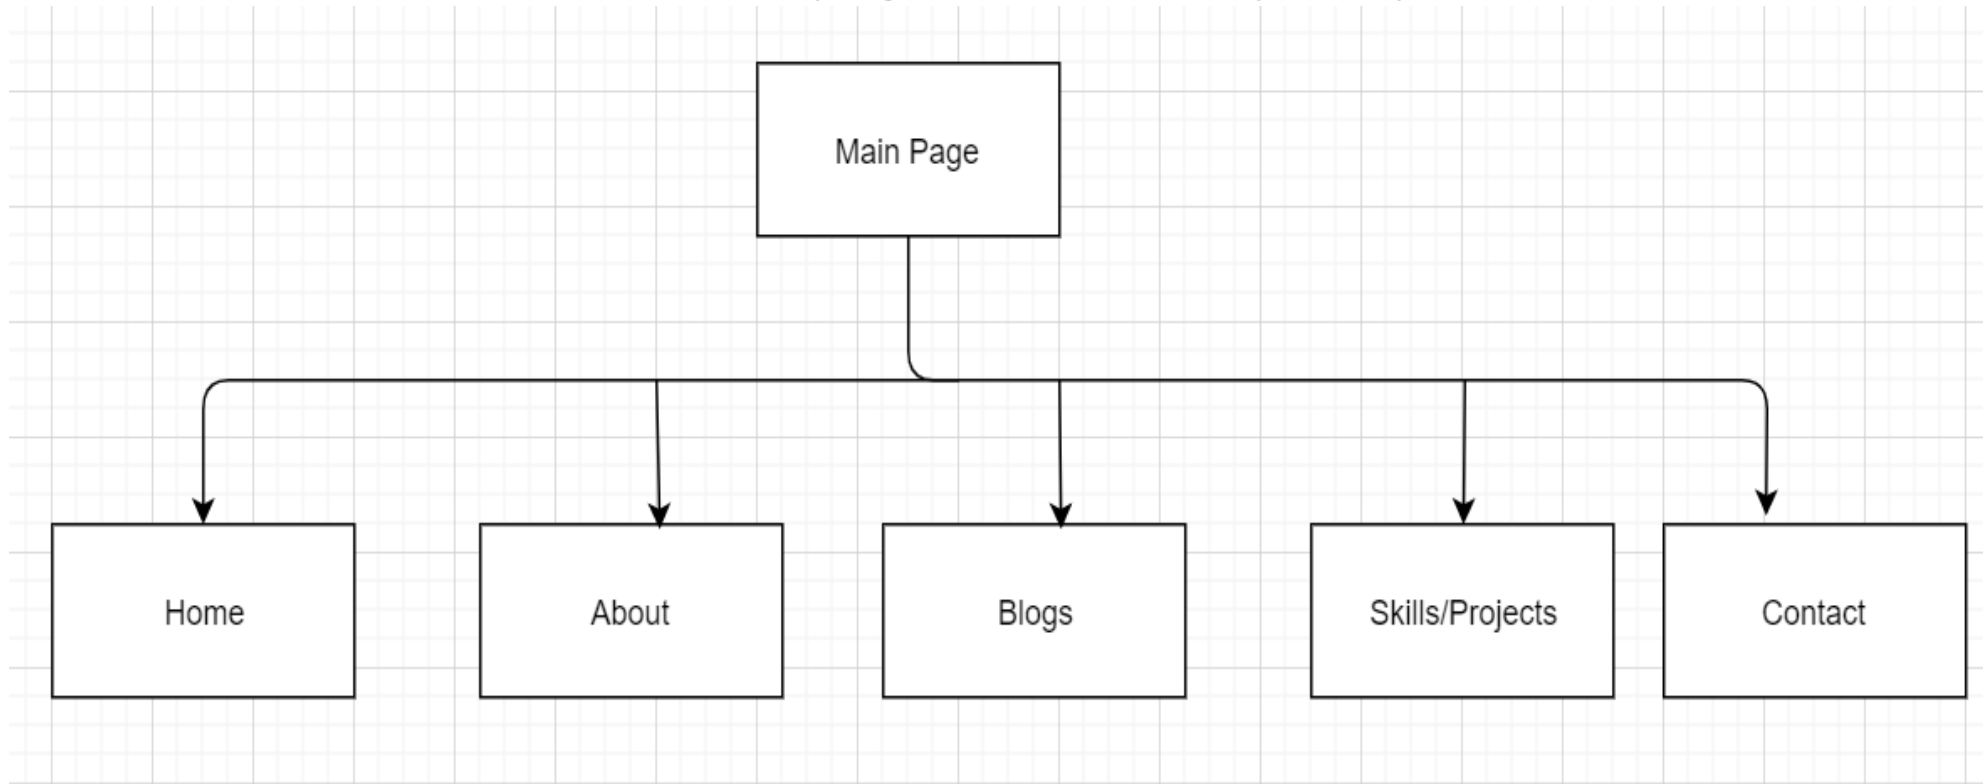

- Light blue for hover
- Light red for background
- Hot pink for Paragraphs
 - Light sky blue

I have mainly used light blue color because it gives gentle look.

I have used other colors as per the focus on the page.

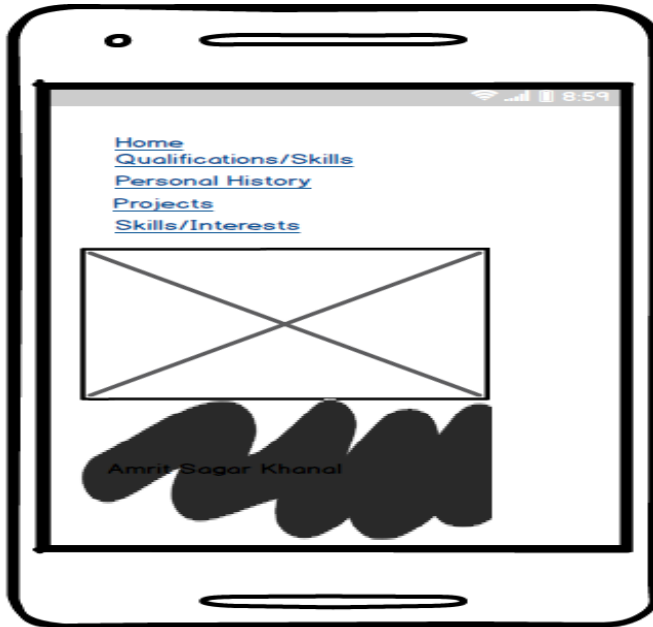

SiteMap

The flow of the pages is shown by the picture below:

Project Management (Trello)

Project Management (Trello)

Project Management (Trello)

The screenshot shows a Trello board titled "Portfolio" with a dark red, rocky background. The board is organized into three columns:

- Portfolio website**: Contains one card titled "Apply SASS and/or SCSS" with a due date of Dec 17.
- Documentation and Presentation**: Contains two cards: "README file" (due Dec 18) and "Slide Deck" (due Dec 18).
- Completed**: Contains five cards: "Website Plan" (due Dec 8, 2/2), "Coding for link Pages" (due Dec 17, 4/4), "Coding for Main Page" (due Dec 17, 4/4), "Review" (due Dec 18), and "Website Launch" (due Dec 18).

Each card has a green progress bar at the top. The board interface includes a search bar, a "Boards" tab, and a "Portfolio" board selector. The browser's address bar shows the URL "trello.com/b/VulxfVSE/portfolio". The Windows taskbar at the bottom displays the time as 8:00 PM on 12/22/2019.

Features

- Flexbox and navigation bar as well as the navigation hover

My reflection what I loved most

- ResponsiveDesign
- Hover effect
- Flex

Major Challenges

- Responsive Design
- Alignment of flex boxes

Future plans/Extensions:

- Use of color more effectively
- Making the homepage more attractive
 - Apply SCSS and SASS
